

Best Doctors

Best Doctors® connects seriously ill Canadians and their treating physicians with world renowned specialists to confirm the right diagnosis and the right treatment options, without the member having to leave home.

Best Doctors Overview

- Founded in 1989 by two Harvard Medical School professors, Best Doctors today has 260 corporate clients representing 10 million lives in 30 countries, including over 4 million Canadians

How it Works

- When you call Best Doctors you will be assigned a Member Advocate, a registered nurse, who will support you throughout the entire process
- Best Doctors collects all your medical records on your behalf and our team of multidisciplinary physicians starts a comprehensive review of all the information
- All pathology is retested and all diagnostics are reviewed
- A leading expert from the Best Doctors database of 50,000 top specialists is selected to make a final determination of diagnosis and provide specific treatment recommendations
- A copy of their report is sent to you and your treating physician if requested

What is in the report?

- The Best Doctors report provides information about your diagnosis and treatment plan options including confirmation of diagnosis, treatment plan recommendations and answers to your questions
- Your Member Advocate will review the report with you and your treating physician may request to speak with the Best Doctors expert

What are the benefits?

- Critically ill members are reassured about the diagnosis made and the best therapy chosen
- Treating physicians get an opinion from a recognized expert who may also offer alternate diagnosis or treatment possibilities in difficult cases
- Prompt diagnosis and appropriate treatment generally result in faster recovery
