

SafeHome Systems

Protecting Seniors Living on their Own

Given the choice, most seniors, both healthy or with physical or medical challenges, would prefer to live independently in their own homes.

While that's not always possible, for many this dream can be a reality with **ProTELEC's SafeHome Systems**.

Whether you're concerned about your safety or that of a loved one, you can relax knowing that **ProTELEC's SafeHome Systems** are on guard, 24 hours a day, 365 days of the year.

ProTELEC SafeHome Systems offer many forms of protection, including:

- An **Emergency Button** in the form of a **watch or pendant** that can be pressed in the event of a medical emergency.
- **Fire and Carbon Monoxide Protection** with the installation of wireless **ProTELEC** smoke and carbon monoxide detectors.
- An easy to use **Large Button Emergency Console** can be programmed to provide medicine reminder messages and act as an activity timer. The console can also operate as a speaker phone.

ProTELEC's trained monitoring staff response is custom designed around your particular needs. You can be contacted first to determine the problem and the needed course of action, or an ambulance can be dispatched immediately and loved ones will be notified.

You are eligible for the first month of SafeHome Monitoring at no charge.
